AddNumbers.java

JAVA

Copy

```java
import java.util.Scanner; // Import the Scanner class to read user input

public class AddNumbers {
    public static void main(String[] args) {
        // Create a Scanner object to read input from the console
        Scanner inputScanner = new Scanner(System.in);

        System.out.print("Enter the first number: ");
        // Read the first integer from the user
        int num1 = inputScanner.nextInt();

        System.out.print("Enter the second number: ");
        // Read the second integer from the user
        int num2 = inputScanner.nextInt();

        // Add the two numbers
        int sum = num1 + num2;

        // Print the result
        System.out.println("The sum of " + num1 + " and " + num2 + " is: " + sum);

        // Close the scanner to prevent resource leaks
        inputScanner.close();
    }
}
```
